Manufactured in North America

This is a new concept in 20'ft and 40'ft container liners for shipping any types freight, food grade products, durable goods electronic devices, pharmaceuticals and cars. Any object which can be put in a ocean shipping container.

It works by keeping moisture, salt, dirt, dust, smells and any contaminates that leak into the container during shipping or were in the container before shipping from contaminating your products. The liner is 100% food grade approved and the liner can be driven on and into with a forklift.

Liner Description:

Open end (door end) PP woven liner.

Intermittent top hanging points.

Lengths of PP rope providing the hanging lines around the top of the container to the liner.

Easy Zig Zag ceiling hanging system.

Front zipper on door way.

Desiccant Bars to absorb moisture.
